ABSTRAK

Keterampilan menulis merupakan keterampilan yang paling sulit dikuasai di antara keterampilan berbahasa lain, salah satunya keterampilan menulis puisi. Penelitian ini bertujuan untuk mengetahui keefektifan metode *image streaming* melalui media gambar dalam pembelajaran menulis puisi. Metode penelitian yang digunakan, yakni metode penelitian eksperimen semu (*quasi experiment*). Sampel dipilih secara *random* dari populasi kelas VIII MTs. Sirnamiskin, sehingga kelas VIII-7 terpilih sebagai kelas kontrol dan kelas VIII-8 sebagai kelas eksperimen. Berdasarkan data yang diperoleh, skor uji reliabilitas antarpemilihan prates dan pascates di kelas eksperimen dan kontrol berkorelasi sangat tinggi. Selain itu, data sampel terbukti berdistribusi normal dengan tingkat kepercayaan 95% serta data bersifat homogen. Adapun hasil dari prates dan pascates menunjukkan nilai di kelas eksperimen lebih tinggi dibanding kelas kontrol. Skor rata-rata prates di kelas eksperimen 68,36 dan skor rata-rata pascates 79,28. Sementara itu, skor rata-rata prates di kelas kontrol 67,28 dan skor rata-rata pascates 74,80. Hal ini menunjukkan bahwa metode *image streaming* melalui media gambar dapat diterapkan dalam pembelajaran menulis puisi.

Application of Image Streaming Method by Picture Medium in the Learning of Poetry Writing (Quasi Experimental Research on Students of 8th Grade in MTs. Sirnamiskin Year 2014/2015)

ABSTRACT

Writing skill is the most difficult one to master among the other language skills, especially in poetry writing. The aim of this research is to find out how effective image streaming method by picture medium in learning of poetry writing. The research method utilized is quasi experiment. The sample is randomly picked from the population of MTs. Sirnamiskin's 8th grade with the result reveals that 8th-7 class as control group and grade 8th-8 as the experimental group. Based on the earned data, score of pretest and post-test of inter-rater reliability test in experimental and control group is highly correlated. Beside that, sample data is evidently in normal distribution with 95% value of reliability and homogen. The result of pretest and post-test shows the experimental group's score is higher than control's. Average score of experimental group's pretest is 68,36 and average score of post-test is 79,28. On the other hand, average score of control group's pretest is 67,28 and average score of post-test is 74,80. The result shows that image streaming method by picture medium is capable to be applied in the learning of poetry writing.
